Relevant Experience

Sample Assist

Software Engineer Intern

Collaborated on software projects, focusing on coding, testing, and debugging. Gained experience with deployment, documentation, and workflow optimization, enhancing problem-solving skills while supporting product quality and client satisfaction

Education

University Of Wollongong

Bachelor of Computer Science

Major in Mobile and Game development

Projects

Job Assist

Next.js, Nest.js, PostgreSQL

This project is part of my capstone project with Sample Assist as our client. Job Assist is the first job marketplace designed for the healthcare sector, catering to doctors, nurses, and other healthcare professionals. In addition to traditional job marketplaces, Job Assist has integrated a freelancing service to tackle short staffing at critical moments.
